Career Objective

Computer Science and Engineering graduate from GITA Autonomous College, Bhubaneswar (CGPA 9.2/10) and Branch Topper, with a strong foundation in applied machine learning, full-stack development and scalable backend engineering. Built Random Forest regression pipelines, Generative AI applications using Groq LLaMA 3, and Django/FastAPI services. Smart India Hackathon 2024 Finalist (Top 5 out of 500+ teams) with a backend and data integration role. Seeking to deepen research grounding through advanced graduate studies in AI/ML and intelligent systems.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering
GITA Autonomous College 2022 – 2026 | Bhubaneswar, India
CGPA: 9.2 / 10.00

Intermediate (Class XII), Science
Aspire SHS School, Giringaput 2019 – 2021 | Bhubaneswar, India
Percentage: 80.3%

Research Interests

Predictive Systems & AI/ML: mathematical modeling, statistical foundations and real-world algorithmic system evaluation.
Intelligent Systems: exploring how predictive algorithms and pattern recognition solve practical problems; aiming for advanced graduate studies in AI/ML.

Projects

MedGuard: Medicine Expiry & Quality Monitoring System SIH 2024
Developed a web-based system to automate medicine expiry monitoring; users upload inventory data in Excel format. Automatically categorized expired, expiring and valid medicines, reducing manual checking in medical stores, with barcode verification for point-of-dispense safety checks. Collaborated in a 6-member team to build and present a solution for a real-world healthcare problem.
Tech Stack: *Django REST Framework, JavaScript, TypeScript, Excel Parsing, Barcode Scanning, SQLite*

SmartTrip AI Planner Full-Stack · Generative AI
Built a full-stack AI travel planner generating personalized itineraries, budgets, routes, weather insights, blogs and vlog scripts. Developed FastAPI and Next.js APIs integrating Groq LLaMA 3 with structured JSON generation, prompt engineering and fallback handling. Integrated Leaflet/OpenStreetMap, Weather and Overpass APIs with authentication, role-based access and multi-user trip collaboration.
Tech Stack: *Next.js, FastAPI, Python, Groq LLaMA 3, PostgreSQL, Leaflet*

Mansik Santulan Score: Mental Health Score Prediction System Machine Learning
Developed an ML-powered application to predict mental health scores on a 0–10 scale using lifestyle, academic, stress and digital-behavior features. Built a Random Forest Regression pipeline with preprocessing and integrated the trained model into a Django backend for real-time predictions. Deployed on Render using Gunicorn and WhiteNoise, with an interactive web interface for generating predictions.
Tech Stack: *Python, Scikit-learn, Pandas, NumPy, Django, REST API, HTML, CSS, JavaScript*

Pawgle: Pet Adoption & Rescue Platform Web Application
Connects pet lovers with rescue animals while giving shelter admins a structured verification workflow. Implemented user authentication, species and gender-based pet filtering, donation request forms, admin approval pipeline, in-app notifications and live adoption-request status tracking.
Tech Stack: *Python, Django, JavaScript, Bootstrap, SQLite*

CheerishCraft: Customized E-Commerce Gift Shop E-Commerce System
Built an e-commerce store for customizable merchandise, celebration gifting and direct order processing. Implemented user authentication, dynamic catalog filtering, shopping cart lifecycle, personalized product specifications, order status tracking and inventory management via Django admin.
Tech Stack: *Python, Django, JavaScript, Bootstrap, HTML5/CSS3*

Repositories: MedGuard · Mansik Santulan Score · Pawgle · CheerishCraft · Portfolio

Software Skills

Languages: Python, Java, JavaScript, SQL, HTML5, CSS3
Web & Backend: Django, Django REST Framework, FastAPI, Next.js, Bootstrap, RESTful APIs
Machine Learning & Data Science: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Groq LLaMA 3 (Generative AI)
Databases: MySQL, PostgreSQL, SQLite
Tools: Git, GitHub, VS Code, Jupyter Notebook, Microsoft Excel, Render
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Core Competencies: Applied Machine Learning (feature engineering, Scikit-learn pipelines, real-time inference); Full-Stack Architectures (Django REST Framework, FastAPI, PostgreSQL, responsive user interfaces); Generative AI & LLMs (structured JSON outputs, prompt orchestration, API scaling).

Experience

Frontend Developer Intern, Authentic Hire Technology Solution 05/2024 – 08/2024

- Gained practical exposure to web development and the process of building user-facing applications.
- Collaborated on building responsive web components and interactive layouts for client workflows.
- Applied best practices in cross-browser compatibility, accessible markup, and interface design.

Certifications

Data Structures & Algorithms in Java, Apna College
Django Development Masterclass, Udemy

Awards

Smart India Hackathon (SIH) 2024 – Finalist 2024
Ranked among the Top 5 out of 500+ teams for the problem statement "Online Testing and Monitoring Quality of Medicines Consumable."

Branch Topper
Ranked 1st in the Second Year of the Computer Science and Engineering Department, GITA Autonomous College.

Extra Curricular Activities

Google Developer Groups Workshop, Kshitij 2024, IIT Kharagpur 2024
Technical workshop on Google Cloud fundamentals, cloud deployment patterns, serverless foundations and modern developer tooling.

Google Cloud Community Day 2024, GDG Cloud Bhubaneswar 2024
Sessions on Generative AI, AI agents, Retrieval-Augmented Generation (RAG), data analytics and cloud technologies.

Declaration

I hereby declare that the details and information given above are complete and true to the best of my knowledge.

Place: Bhubaneswar, Odisha
Date: 29 October 2026
